Executive Summary

CCPATIO's strategic investment in factory expansion, including the acquisition of multiple electric and gas ovens, strengthens its ability to capitalize on robust sales and achieve ambitious growth projections.

Despite facing hurdles in the permitting process, particularly for the gas ovens, this expansion enhances production capacity and positions the company for continued success. This takes the previous maximum capabilities from 5MM in revenues to 50MM annually.

Key Highlights:

- **Increased Production Capacity:** New, state-of-the-art gas ovens will enable a dramatic increase in output, from 10 racks of furniture per day to 15 racks per hour.
- **Enhanced Efficiency:** Automation and streamlined processes will allow for a 10x increase in production with only a 3x increase in labor costs.
- **Improved Profitability:** Projected net profit margins are expected to rise from 11.5% to 20%+ with the higher throughput capabilities.

Financial Impact Unleashed Production

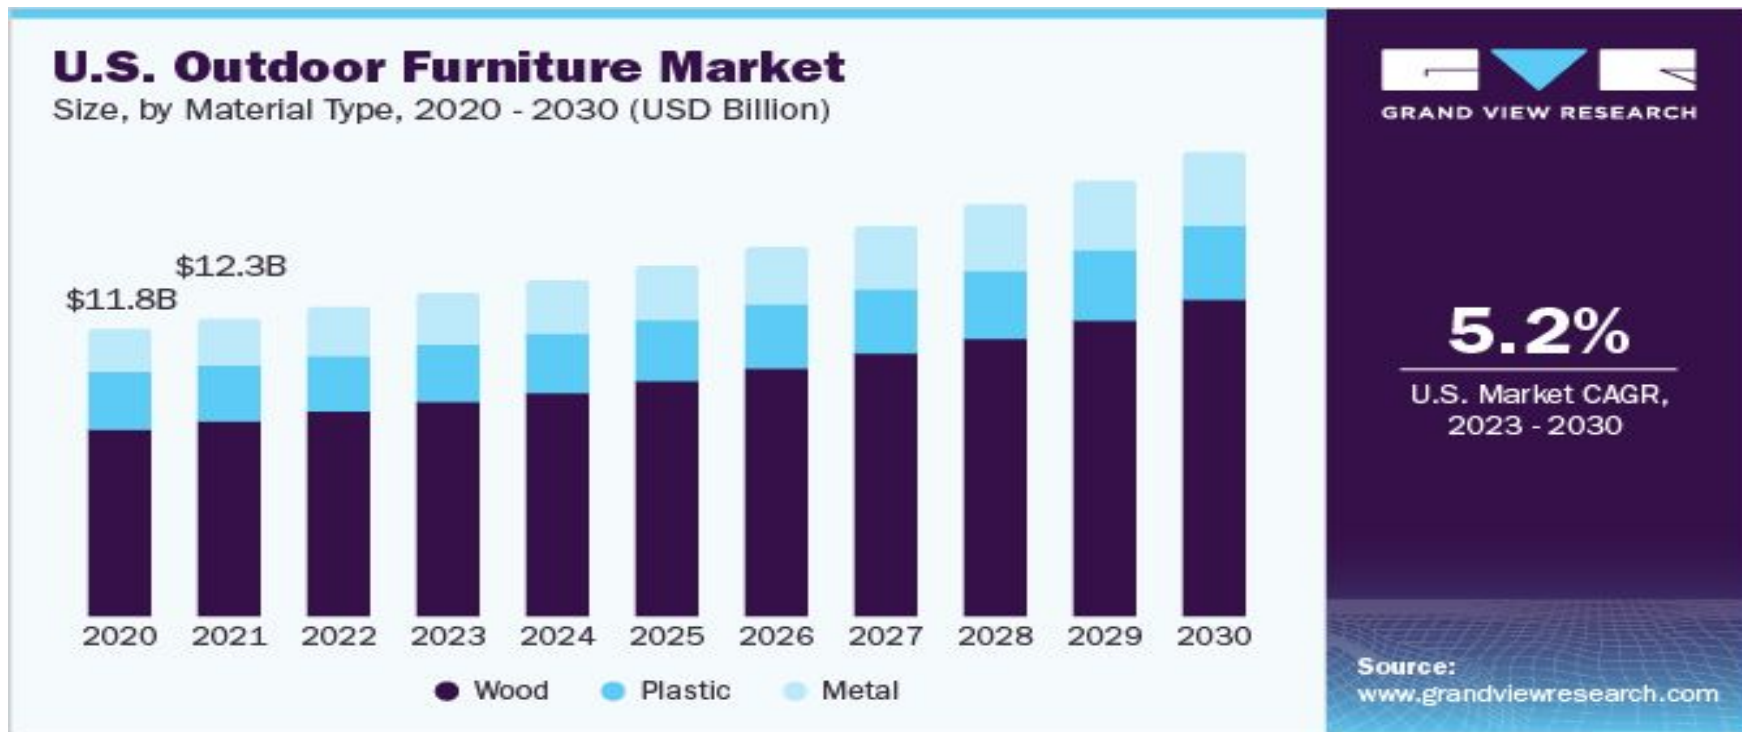

CCPATIO Revenues have been on an upward trend, in 2023 it reached its max throughput due to equipment limitations, new modern equipment will continue this trend.

Manufacturing can now match sales forecasts with an increased ability to produce 5x more product with the new facility and equipment capabilities.

Sales has historically been throttled back due to production capabilities, it's time to unleash and throttle forward!
