

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

Overview

PrimeView will turn selected CC Patio products into a structured online purchasing experience. Customers will be able to choose approved configurations, see applicable upgrade pricing, add products to their cart, and pay securely online.

The project is designed to:

- *Reduce manual order entry and customer back-and-forth.*
- *Prevent required product selections from being missed.*
- *Apply approved option and upgrade pricing consistently.*
- *Preserve customer selections throughout the order process.*
- *Provide CC Patio with complete order and payment information for fulfillment.*

The implementation will use CC Patio's existing website design system and theme. Website redesign, branding, custom graphic design, and broader visual revisions are not included.

This proposal covers the ecommerce foundation and configuration of between 1 and 25 approved products.

Scope assumption: *The project estimate is based on WooCommerce using approved third-party plugins for product options, upgrades, add-ons, and upsell functionality. It does not assume a custom visual configurator, a new manufacturing-grade SKU architecture, or custom production-system integration.*

Scope of Work

1. Product Pages

PrimeView will create one reusable ecommerce product-page template that can be applied to the approved CC Patio products.

The template will support:

- Product choices such as arms, casters, Ironwood components, finishes, fabrics, and Fly Tables.
- Approved upgrade and add-on pricing.
- The approved \$100 charge for each applicable arm selection.
- Required color, finish, fabric, and configuration fields.
- Storage of all customer selections with the order, including selections priced at \$0.
- Conditional product choices, such as displaying Dekton options only when a Fly Table is selected.
- Add to Cart functionality.
- Product information and configuration details within the cart, checkout, and completed order.
- Existing product SKUs supplied by CC Patio, when applicable. Customer-selected options, finishes, fabrics, and add-ons will be stored separately with the order. Creation of a new SKU structure or unique SKUs for every product configuration is not included.
- Made-to-order or lead-time information supplied by CC Patio.
- Product titles, descriptions, pricing, images, and basic product information supplied through the approved product worksheet.

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

Standard Product Setup Definition :

- The estimated 1 hour per product applies because PrimeView will build one approved template and apply that template to the remaining products.
- A standard product setup includes:
- One base product.
- One base price and an existing product SKU, when supplied by CC Patio.
- Client-supplied product copy and images.
- Approved option groups and values that fit within the product-page template.
- Approved add-on pricing.
- Approved conditional display and pricing rules.
- Product-specific shipping information supplied by CC Patio.
- Basic product metadata and category assignment.

The one-hour-per-product estimate assumes that CC Patio provides all product information, pricing, images, and option rules before setup begins.

The one-hour-per-product estimate further assumes that product options can be implemented using the approved WooCommerce plugin structure and do not require creation of unique variations, component SKUs, bills of materials (BOMs), or external manufacturing-system mappings

Products requiring a substantially different page structure, custom configurator, image changes based on selections, bundled or sectional-building functionality, unusual pricing calculations, or functionality outside the approved template will be reviewed and estimated separately before configuration.

Product Data Worksheet

CC Patio will provide all product information through one consolidated worksheet supplied or approved by PrimeView. Product setup will begin only after the corresponding product information has been marked complete and approved by CC Patio.

The worksheet may include:

- Product name
- Existing SKU, when applicable
- Base price
- Description
- Images
- Dimensions
- Weight
- Packaged shipping dimensions
- Freight class
- Available options
- Add-on pricing
- Conditional display and pricing rules
- Production lead time
- Made-to-order information
- Other required product details

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

Incomplete, conflicting, or changing product information may affect the project schedule and require additional hours.

CC Patio is responsible for defining and supplying any SKU, component, BOM, manufacturing, or product-mapping structure required by Katana, VividWorks, or other production/configuration systems unless PrimeView is separately contracted in writing to create or restructure that data.

Estimated hours:

- Product-page template: **12 hours**
- Product setup: **1 hour per product**
- Product range: **1–25 products**

2. Freight and Shipping Integration

PrimeView will connect the website to the approved freight or shipping platform.

The integration will be configured to support the specific functions approved before implementation, which may include:

- Sending completed website order information to the approved shipping platform.
- Transferring customer, product, weight, dimension, freight-class, and delivery information when supported.
- Configuring approved delivery options presented during checkout.
- Supporting approved residential, liftgate, limited-access, local-pickup, LTL, or white-glove delivery rules when supported by the selected system.
- Returning shipment or tracking information to the website when supported.
- Testing the approved website-to-shipping-platform connection.

The selected shipping platform and its supported features must be approved before configuration begins.

Estimated hours: 5

CC Patio is responsible for:

- Establishing freight-carrier and shipping-platform accounts.
- Negotiating carrier pricing and service terms.
- Providing account credentials and approved access.
- Confirming the shipping origin location.
- Providing product weights, packaged dimensions, freight classes, and shipment quantities.
- Defining delivery areas and available delivery methods.
- Providing liftgate, residential, limited-access, white-glove, local-pickup, and additional-charge rules.
- Managing carrier-account settings and ongoing fulfillment operations.
- Confirming how shipping should be presented and charged during checkout.
- Managing shipment creation, fulfillment, order-status updates, tracking, cancellations, and delivery issues after launch.

PrimeView will connect and test the approved system. PrimeView will not negotiate freight rates, select carriers on behalf of CC Patio, determine CC Patio's shipping charges, or manage order fulfillment.

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

3. Online Payment Integration

PrimeView will:

- Connect the approved NMI payment system to the website.
- Configure customer payment during checkout.
- Test successful and unsuccessful payment attempts.
- Confirm that successful payments create completed website orders.
- Configure the approved checkout payment behavior using the methods supported by NMI.
- Confirm the responsibility boundaries for fraud settings, refunds, chargebacks, and payment-account administration.

Estimated hours: 8

CC Patio is responsible for:

- Establishing and maintaining the NMI account.
- Completing account approval and underwriting requirements.
- Providing the required credentials and account information.
- Managing banking relationships, transaction fees, fraud settings, chargebacks, and account requirements.
- Completing any setup required directly within NMI.
- Processing operational refunds after launch.

PrimeView is responsible for connecting the approved payment system to the website and testing the connection.

4. Sales Tax

PrimeView will configure the website's sales-tax functionality using one approved approach:

- Native or manually provided tax rates; or
- An approved automated sales-tax service, when purchased and supplied by CC Patio.

PrimeView will:

- Enable the applicable ecommerce tax settings.
- Configure tax collection for the jurisdictions identified by CC Patio.
- Add the tax rates or connect the approved tax service.
- Test tax calculations during checkout.
- Configure approved tax treatment for applicable customer or order types when supported by the selected system.

Estimated hours: 2

CC Patio is responsible for:

- Determining the states and jurisdictions in which tax must be collected.
- Providing accurate tax rates when manual tax configuration is selected.
- Confirming special product, resale, exemption, trade, or customer tax rules.
- Maintaining any third-party tax account or subscription.

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

- Reviewing and approving the tax configuration before launch.

PrimeView does not provide legal, tax, or accounting advice and does not determine CC Patio's tax obligations.

5. Shopping Cart

PrimeView will:

- Configure the shopping-cart page.
- Display selected product configurations and applicable pricing.
- Test quantity changes and product removal.
- Check product subtotals, shipping, taxes, and order totals.
- Confirm that customers can proceed from the cart to checkout.

Estimated hours: 4

6. Checkout

PrimeView will:

- Configure the checkout page.
- Add the required billing and shipping fields.
- Connect payment, shipping, and tax functionality.
- Configure guest checkout, account checkout, or both, based on the existing platform and CC Patio's approved preference.
- Add required customer acknowledgment checkboxes using wording supplied and approved by CC Patio.
- Support acknowledgment of applicable terms, custom or made-to-order status, lead-time statements, and final-sale or cancellation rules.
- Store the customer's acknowledgment with the order when supported by the ecommerce platform.
- Test the complete checkout process.
- Confirm that completed orders are saved correctly.
- Confirm that customers reach an order-confirmation page.

Estimated hours: 4

7. Policy Pages

PrimeView will add, format, publish, and link the following pages:

- Terms and Conditions
- Refund and Return Policy
- Privacy Policy
- Shipping Policy

PrimeView will:

- Add the approved wording to the website.
- Apply basic formatting.
- Publish the pages.
- Link the pages in the appropriate website and checkout locations.

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

Estimated hours: 2

CC Patio is responsible for providing the complete, final, and approved wording for all policy pages.

PrimeView will not write the policies, provide legal advice, or determine whether the wording satisfies legal or regulatory requirements.

8. Staging, Backup, Deployment, and Testing

PrimeView will:

- Create or confirm an available backup before deployment.
- Test the ecommerce functionality before launch.
- Schedule deployment of the approved changes.
- Deploy the approved website changes.
- Provide an emergency rollback for deployment-related issues when technically possible.

Testing will include:

- Product selections and required fields.
- Product and upgrade pricing.
- Conditional add-on rules.
- Add to Cart functionality.
- Shopping-cart calculations.
- Checkout functionality.
- Successful and unsuccessful payment attempts.
- Tax calculations.
- Shipping integration.
- New-order creation.
- Order and configuration details.
- Customer acknowledgment fields.
- Desktop and mobile functionality.
- Current versions of major browsers, including Chrome, Safari, Firefox, and Microsoft Edge.
- Basic functional accessibility checks.
- Basic error handling for incomplete selections, payment failures, and checkout submission.

Testing does not guarantee compatibility with every device, browser version, extension, third-party configuration, or customer network environment.

Estimated hours: 10

Implementation Timeline

The estimated implementation schedule is approximately six weeks after all required project materials and access have been received.

Milestone	Target
Kickoff and access confirmation	Week 1
Product worksheet review and initial product setup	Week 1
Product template and initial product review	Week 2
Remaining product configuration	Weeks 2–4
Payment, tax, and freight integration	Weeks 3–4
Internal testing and corrections	Week 5
Final launch preparation and deployment	Week 6

The schedule begins after PrimeView receives:

- The signed agreement and required payment.
- Complete product data.
- Approved product option and pricing rules.
- Approved policy content.
- Shipping and payment credentials.
- Tax instructions.
- Third-party platform access.
- Required client decisions and approvals.

Client delays, incomplete information, revised product rules, account-approval delays, or third-party technical issues may change the target schedule.

Investment

Category	Estimated Hours
Product-page template	12
Freight and shipping integration	5
Payment setup and testing	8
Tax setup	2
Shopping cart	4
Checkout	4
Policy pages	2
Testing	10
Base Project Hours	47

CC Patio
E-Commerce Website Proposal
<https://www.ccpatio.com/>
Sep 1, 2026

Standard product configuration	1 estimated hour per product
--------------------------------	------------------------------

Number of Products	Estimated Total
1 product	48 hours
5 products	52 hours
10 products	57 hours
15 products	62 hours
20 products	67 hours
25 products	72 hours

PROJECT INVESTMENT: \$5,760–\$8,640*

Third-Party Plugin and Service Costs: To Be Determined

Payment Terms:

*Client will pay an initial deposit of **\$2,000 upon signing**. The remaining approved project balance will be divided into **six equal monthly installments**, with the first installment due **30 days after signing** and subsequent installments due monthly thereafter.*

Third-party plugin, software, licensing, subscription, transaction, and service fees are not included in these installment amounts and will be billed or purchased separately.

Approved Project Total	Initial Payment	Six Monthly Installments
\$5,760	\$2,000	\$626.67 each
\$8,640	\$2,000	\$1,106.67 each

Installment amounts shown above are examples at the low and high ends of the approved project range. The actual monthly installment will be calculated from the final approved project total after the number of products is confirmed.

The final project investment will be determined by the number of approved products selected before kickoff. The resulting amount will serve as the approved project budget for the scope described in this proposal. PrimeView will not exceed the approved budget without written authorization from CC Patio.

Third-party plugin, licensing, subscription, transaction, and service fees are not included in the project investment and will be purchased or billed separately.

CC Patio

E-Commerce Website Proposal

Sep 1, 2026

Project Assumptions and Conditions

The estimated hours and project cost are based on the scope described in this proposal and assume that CC Patio provides all required product information, pricing, images, option rules, account access, policy content, shipping information, and approvals before the applicable work begins.

The estimated project range of **48–72 development hours** is achievable provided that:

- Required information and account access are delivered without delay.
- Product details are complete and accurate before product setup begins.
- Feedback and approvals are provided promptly.
- No additional functionality is requested after the project begins.
- Revisions remain within the scope described in this proposal.
- Third-party systems and plugins function as documented by their providers.

Client delays, incomplete information, changes to previously approved work, additional revision requests, third-party technical issues, or newly requested functionality may increase the total project hours and affect the completion schedule.

PrimeView will notify CC Patio in writing before performing work that is expected to exceed the approved project budget.

If VividWorks, Katana, or another third-party platform requires changes to the approved WooCommerce product architecture, SKU structure, checkout workflow, product-option logic, order-data structure, BOM structure, or manufacturing workflow, PrimeView will review the impact and provide a separate estimate before implementing those changes.

Design and Visual Revisions

This proposal does not include website redesign, custom graphic design, branding, creative direction, or visual revisions beyond the basic formatting required to implement the online store functionality.

The product-page template, shopping cart, checkout, and policy pages will be configured within the website's existing design system and theme.

Requests involving layout redesign, custom styling, new visual concepts, image editing, branding changes, or revisions based primarily on visual preference will be considered outside the current scope and billed at PrimeView's standard hourly rate after written approval.

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

Third-Party Plugins and Service Fees

The project cost listed in this proposal covers PrimeView's labor for configuring, connecting, and testing the approved ecommerce, shipping, payment, and related website systems.

Third-party costs are not included in the project price. These may include:

- Shipping or freight plugins
- Payment gateway plugins
- NMI account or transaction fees
- Carrier account fees
- Ecommerce extensions
- Software subscriptions
- Licensing fees
- Setup, renewal, or usage charges assessed by third-party providers

The final third-party plugin and service costs are currently **to be determined** because the specific systems and subscription plans have not yet been selected or approved.

CC Patio is responsible for purchasing and maintaining all required third-party accounts, licenses, subscriptions, and services. PrimeView will provide recommendations when appropriate, but third-party pricing, availability, functionality, and support are controlled by the applicable provider and may change without notice.

Any additional PrimeView time required because of third-party limitations, compatibility issues, provider support delays, account approval delays, or changes to the selected system will be billed separately after written approval.

Integration, configuration, product-data restructuring, SKU mapping, BOM mapping, or workflow development required specifically for VividWorks, Katana, or other manufacturing/configuration platforms is not included in the current project scope unless separately approved in writing.

Included and Excluded Ecommerce Functions

Included When Supported by the Approved Platform

- Existing product SKUs supplied by CC Patio, when applicable.
- Guest checkout, account checkout, or both, as approved.
- Made-to-order and production lead-time wording supplied by CC Patio.
- Approved local-pickup or white-glove delivery choices.
- Basic ecommerce purchase and checkout tracking when existing analytics systems are properly installed.
- Basic product titles, metadata, and structured product information.
- Basic functional accessibility testing.
- Customer acceptance of approved terms during checkout.

CC Patio

E-Commerce Website Proposal

<https://www.ccpatio.com/>

Sep 1, 2026

- Approved tax treatment supported by the selected system.
- Full-payment checkout through NMI.
- Approved shipment and tracking connection supported by the shipping platform.

Excluded Unless Added Through Written Change Approval

- Coupon-code strategy or campaign setup.
- Gift cards.
- Abandoned-cart automation.
- Financing.
- Deposit or installment-payment functionality for customer checkout.
- Trade-program pricing portals.
- Fabric-swatch ordering systems.
- Advanced product filtering or search redesign.
- Advanced inventory or production-management systems.
- Custom visual product configurators.
- Real-time product image changes based on selections.
- Custom sectional-building tools.
- Automated manufacturing workflows.
- Order editing after payment.
- Partial-shipment workflows.
- Advanced analytics or advertising-event configuration.
- Custom SEO campaigns.
- Custom accessibility remediation.
- Custom integration with accounting, ERP, CRM, or production systems.
- VividWorks or Katana implementation work that requires new SKU structures, component mapping, BOM mapping, manufacturing workflow design, product-data restructuring, custom API work, or changes to the approved WooCommerce architecture.

Project Outcomes

Upon completion of the approved scope:

1. Selected CC Patio products will be available for online purchase.
2. Required product options cannot be skipped.
3. Approved upgrade and add-on pricing will calculate consistently.
4. Customer selections will remain attached to the completed order.
5. CC Patio will receive the information required to review and fulfill the order.

Additional Hours and Change Control

This agreement establishes the process for work that exceeds the originally approved scope or estimated hours.

Additional hours may be required when:

- CC Patio requests additional products, features, options, or functionality.
- Product information or requirements change after setup has begun.
- Previously approved work must be revised or rebuilt.

CC Patio
E-Commerce Website Proposal
<https://www.ccpatio.com/>

Sep 1, 2026

- Additional visual or design revisions are requested.
- Information, approvals, credentials, or account access are delayed.
- Third-party plugins or service providers require additional configuration, troubleshooting, or replacement.
- Undisclosed technical issues are discovered within the existing website.
- VividWorks, Katana, or another production/configuration platform requires additional SKU mapping, BOM mapping, data restructuring, custom workflow development, or changes to the approved ecommerce architecture.

Client Approval

This agreement outlines the terms for billing any project hours that exceed the initially agreed-upon scope. Should the total hours required to complete the project exceed the hours estimated in the original agreement, the Client agrees to compensate the Service Provider at the hourly rate. PrimeView will notify the Client in writing if the project is expected to exceed the estimated hours, and no additional work will be performed until written approval is received from the Client. Overage hours will be invoiced separately by PrimeView to CC Patio
